Genetics Australia Co-operative Ltd and all affiliates - Catalogue Disclaimer Statement

Disclaimer: The content of this Catalogue is provided for information only. It is published with care and attention to accuracy, nevertheless Genetics Australia Co-operative Ltd and all affiliates (GAC) accepts no liability if, for any reason the information is inaccurate or out of date whether negligent or otherwise.

Limitation of Liability: GAC warrants that it has clear title to the products sold and that all semen processed in its laboratory is processed under rigid quality controls. Since GAC does not control conditions under which its products are used it does not give, and its agents and employees are forbidden to give, any warranty expressed or implied as to the conception rate or productiveness or the results which may be obtained by the use of any product sold or in connection with any techniques recommended. GAC makes no other warranty of any kind whatsoever expressed or implied which extends beyond the description of its products. Where so permitted the liability of GAC for breach of a condition or warranty implied by statute is limited at GAC's option to the replacement or repair of the goods or the supply of equivalent goods or the cost of replacing or repairing the goods or of acquiring equivalent goods. So far as the law permits GAC shall not be liable in any way whatsoever for any indirect or consequential loss or loss of profit.

Sexed (sorted) semen: Artificial Insemination products (straws) that GAC offers for sale as sexed (sorted) semen using Sexing Technologies proprietary technology, shall only be used for single-use artificial insemination and not for in-vitro-fertilisation or embryo transfer.

Prices: All prices listed within this publication are listed exclusive of Goods and Services Tax (GST), so GST will be added at the time of purchase.

Source data: Data referencing Australian Breeding Values (ABVs) information unless otherwise stated is sourced from DataGene August 2022 breeding value release. Data referencing United States of America Breeding Values are provided through the Council on Dairy Cattle Breeding (CDCB) this information unless otherwise stated is sourced from CDCB August 2022 breeding value release.

MEMBER OFFER

Several bulls appear with a Member Offer symbol. These bulls are exclusively available at a GA Shareholder price of \$14.00* per straw, a significant saving on the bulls RRP. The offer is for a limited time and ends on the 30th of November, 2022.

WELCOME TO THE AUGUST 2022 EDITION OF THE GENETICS AUSTRALIA HOLSTEIN SIRE DIRECTORY...

We received positive feedback on having a dedicated Holstein breed sire catalogue, following the April ABVs. We trust you find it an informative source for information and now reference the August ABV has been released. Both local and international sires appear in this the directory and includes breeding values from Australian and USA data sources.

We welcome the release of the August ABVs with the new Sustainability Index [SI] release for the first time. The continual improvement in the Australian Breeding Values is a real credit to the DataGene team and the quality of the Holstein bulls available in Australia today has never been better.

A combination of genomic and daughter-proven sires make-up the offering and in-particular SUPERPOWER, now one of the best daughter proven bulls available and SUPERDAVE, a high production bull now with over 200 milking daughters. The very first 32 milking daughters of popular genomic sire PEMBERTON indicate he could have a big impact in future breeding programs with 500+ BPI, high ASI and over 1,000 for Sustainability Index.

Several young genomic bulls continue to rate at the top in the August release with bulls like TOMMYDEE, SAMARIA, SONDALO, DECIPHER, KARAT, CINDERMAN and SHOALHAVEN all 500 or greater for BPI, while new addition STARMAGIC is

available for the first time and offers an impressive 524 for BPIg and 107 for Mammary. He will be limited in supply so early ordering is well advised.

We have added young sires with tremendous depth of pedigree and performance, and I particularly refer to EASTERN, JOLET, JOPPO, all new release young sires developed from Australian cow families. We continue to identify pedigree diversity combining traits of increased importance such as longevity, health and fitness, feed efficiency, heat tolerance and polled genetics. Greater emphasis will also be placed in future on the new Sustainability Index contributing to breeding a "Greener Cow" that is more sustainable for the future.

We draw your attention to some attractive product offering detailed in this catalogue. A new red Holstein JSNETWORK is also included for the first time offering a good balance of production, health and type.

We remain committed at Genetics Australia, to continue to invest in genetics best suited to Australian farming systems for the betterment of our all our members and dairy producers. We look forward assisting you in bull selection, our goal remains to provide improved returns and ongoing development to your business via genetic improvement.

Genetics Australia - Breeding Better Australian Herds...

MONITOR HEAT AND HEALTH FROM WHEREVER YOU ARE.

Highly accurate Heat detection

Active Tag enhances the management of breeding programs by detecting subtle gestures and behaviours that aren't visible to the naked eye. Finetune mating, manage calving dates, and actively reduce the instances of silent heats and wasted straws.

Better animal health 365-days a year

Active Tag monitors your cows, learning each individual's movements and behaviours. Get alerted to changes in behaviour signaling a potential health concern, often before the animal presents with any visual signs of illness.

Best in class Gateway

- Up to **1,000 metres***, **360 degree**, line-of-sight range
- Auto-synchs with overlapping Gateways to maximise coverage
- Real-time communication via mobile or Wi-Fi networks
- Full coverage for up to 5,000 animals per Gateway

*Under optimal conditions

See how animals are performing via simple graphs and charts.

Active Tag

View heat and health data history on individual animals or groups. Easily print or download reports and graphs in common file formats.

Dairy Mac Superthaw

The DairyMac Digital SUPERTHAW™ is designed and manufactured in the UK. It is based on a comprehensive list of 'needs' and 'desires' from our discussions with farmers, AI Technicians and Vets. It is very important that bull semen is thawed consistently at the right temperature. Comes with either Flip Lid or Gun Warmer.

**NOW AVAILABLE
RECHARGEABLE - \$550.00**

CIDR

The original cattle oestrus synchronisation insert

There are many benefits to using synchronising inserts to assist in reproduction, potentially including:

- better fertility - increased conception rates
- tighter calving pattern
- easier cattle management
- reducing the time spent on heat detection

Are you looking to maximise your on-farm production? What about convenience? This temperature controlled carrying case for loaded A.I. guns is your answer. Look no further, DairyMac AI Gun Superwarmer, **\$950.00**

Let us help you find your standout heifers.

We are here to assist you with the many Genomic Services we have available including:

- Genomics on BPI, TPI, JPI & LPI bases
- Assistance on farm with sampling
- A2 Testing and Full Milk Protein Testing
- Choosing the correct export heifers
- Polled, JH1, BVD Testing
- Nominating key replacements

One sample, one simple comprehensive solution.

*Working with the local leading Australian genomic laboratory “Neogen Australasia”
to support your breeding and export decisions.*

Discuss the range of testing options available with your local Genetics Australia
Sales Representative or alternatively contact TLGV on the details below:

We draw your attention to the Genetics Australia International Holstein line-up that features bulls with US breeding values.

The ongoing distribution and relationship with World Wide Sires for a lengthy period and more recently with Jetstream Genetics and Vogue Genetics is greatly valued by Genetics Australia. It offers greater diversity to the Genetics Australia portfolio adding to the quality and range of bull available from the cooperative.

The integrational portfolio provides the opportunity for farmers to accelerate some traits of importance such as 'Polled' genetics. Selection of management traits has accelerated in recent years, and we are pleased to offer greater product depth for traits of growing importance.

ESTROTECT™
BREEDING INDICATOR

BREEDING SUCCESS

THE WORLD'S LEADING BREEDING MANAGEMENT INDICATOR NOW FEATURING THE BREEDING BULLSEYE™!

The NEW ESTROTECT™ Breeding Indicator featuring patent pending Breeding Bullseye™ technology makes it easier than ever to identify cows that are in heat, pinpoint timing for AI and Timed AI protocols, as well as confirm successful pregnancies.

According to third-party research, when the new ESTROTECT™ Breeding Bullseye™ is rubbed off by mounting activity, cows are up to three times more likely to conceive. Not only does ESTROTECT™ with the Breeding Bullseye™ indicate when a cow is in heat, it tells you exactly when the animal should be bred to achieve optimal results.

To learn more about the new and improved ESTROTECT™ featuring the Breeding Bullseye™, visit www.ESTROTECT.com!

AS GOOD AS A BULL™

www.ESTROTECT.com

Genetics Australia is excited to be partnering with MVE as the most trusted source of Semen Tanks available in Australia

TRUSTED BY THE BEST FOR 55+ YEARS

MVE is trusted by the best and engineered for the best result.

Protecting and preserving the best genetics for over 55 years through industry-leading service and precision engineering.

CONTACT GENETICS AUSTRALIA FOR YOUR AI TANK NEEDS

**Advanced Chemical
Vacuum Retention
System**

**Save money with
Low Liquid Nitrogen
Consumption**

**Many tank sizes for
different capacity
and duration needs**

**Durability built
for the farm**

TRACKING YOUR HERDS GENETIC PERFORMANCE WITH GENESCREEN

Genescreen is your complete genetic analysis package.

It provides you with individual cow mating suggestions based on either pedigree estimates or genomic breeding values. Track your herds performance through the Genescreen benchmarking module.

Genescreen gives you the ability to analyse and understand where your breeding program is taking you.

To order a FREE Genescreen, contact your local Genetics Australia representative or email genescreen@genaust.com.au
